Paper converting, roll slitting and wholesale paper supply

Plan the converting specification.

Confirm the required width, winding direction, core, coating grade, quantity and packing with our team before ordering.

Available widths

405 / 565 / 636 / 790 / 795 mm

From material to finished rolls.

Plan your specification.

1. Select the product and application.

2. Confirm width, roll diameter or length, core and material.

3. Prepare artwork, label construction and packing requirements.

4. Confirm samples, quantity, destination and quotation.

Production photograph supplied by the company. Product availability and final specifications are confirmed for each order.

Let us plan your next order.

Quotation checklist

Send the product, complete dimensions, core, paper grammage or label material, printing, packing, quantity and destination.

Samples

Tell us the grade and format you want to evaluate. Sample availability, courier arrangements and costs are confirmed with our team.

Specifications

Paper grammage is basis weight, not thickness. Roll length and printer compatibility must be checked for the selected material and core.

Commercial terms

Current pricing, MOQ, production timing, shipping and payment terms are confirmed in the quotation and order agreement.
